Projects

E-commerce Webiste ⧉
A responsive online bakery store built with Next.js and Firebase, featuring dynamic product listing, user authentication, protected routes, and a shopping cart for seamless functionality.

Attendance App
Built with the MERN stack, this application allows users to log in, manage profiles, mark attendance, and view past records, while admins can securely add students and manage attendance data.

Internship Webiste
Crafted an intuitive internship website using MERN stack, connecting students and companies seamlessly for internship opportunities.
